

## BP4Apps Learning

### Oracle Learning Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

#### Enormous competitive advantages through personalized and multimedia training

As part of the Talent Management Cloud, the Learning Cloud is an intelligent system for the training of employees and enables a faster reaction to changes in the business environment, an increase in productivity and the sharing of knowledge through different communities. The solution integrates traditional, formal, guideline-based learning with modern, social and informal learning, creating enormous competitive advantages. Personalized multimedia training contents can be called up everywhere and anytime. Executives can assign learning tasks to their employees and subsequently track their learning progress. By embedding Learning into other HCM Cloud applications, the training is ensured in the context of the respective business processes.

#### Comprehensive process- and user knowledge for Oracle Learning Cloud

With Horus BP4 Learning, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

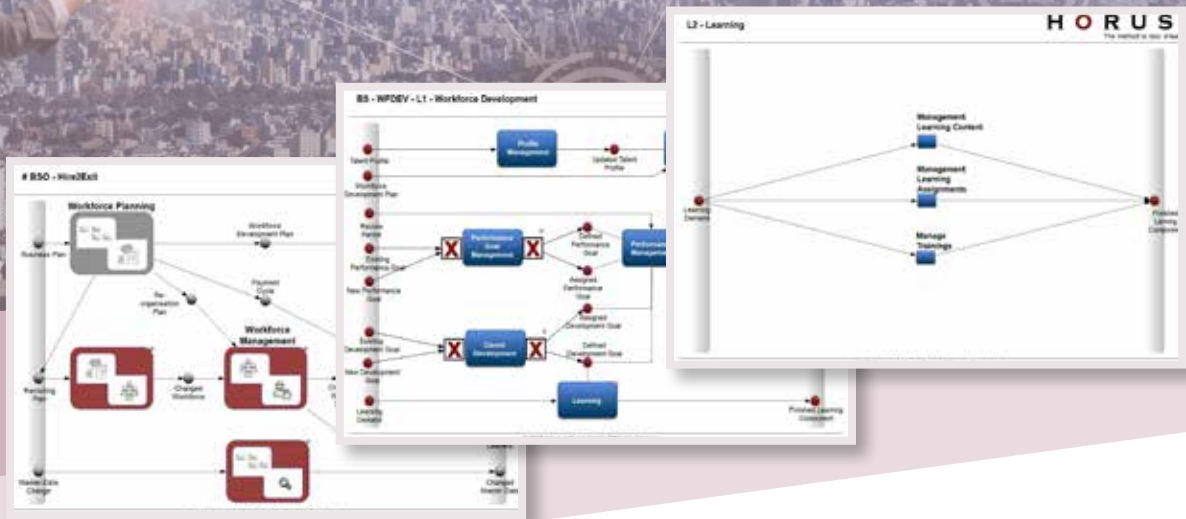

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with regard to the possibility of exchanging invaluable knowledge within the user community.

#### Components of the knowledge product BP4 Learning

An extensive knowledge base is the core of Horus BP4 Learning and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core consists of the following modeling components:

- Blended Learning
- Modern course management & participant management
- Mobile access to learning contents
- Manager self-service for control and progress monitoring
- Reporting

Extensive knowledge models for functional structures of the Oracle Learning Cloud

## Commercial Framework

The price of BP4 Learning is determined according to the Oracle Learning Cloud services licensed for the customer as follows:

Volume class	Hosted Named User	Annual subscription fee
I:	≤ 1.500	EUR 800,00
II:	1.501 - 3.000	EUR 1.600,00
III:	> 3.000	EUR 2.400,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

## Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
