

## BP4Apps Time and Labor

### Oracle Time and Labor Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

#### Fast time recording and easy management of employee availabilities

Oracle Time and Labor is a comprehensive, user-friendly and rule-based management system for precise time recording. For an optimal management of the availabilities, the application provides a general overview of the working hours as well as the vacation plans of employees. Simple, configurable rules guarantee a precise and punctual remuneration. Thanks to a proactive measurement of hours worked with regard to the predefined key figures, working costs can be minimized and the compliance with guidelines is ensured. To optimize the time management for the entire business, the solution is integrated completely with timing devices and other HCM and ERP solutions such as absence management, payroll, project costing and financials.

#### Comprehensive process- and user knowledge for Oracle Time and Labor Cloud

With Horus BP4 Time and Labor, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

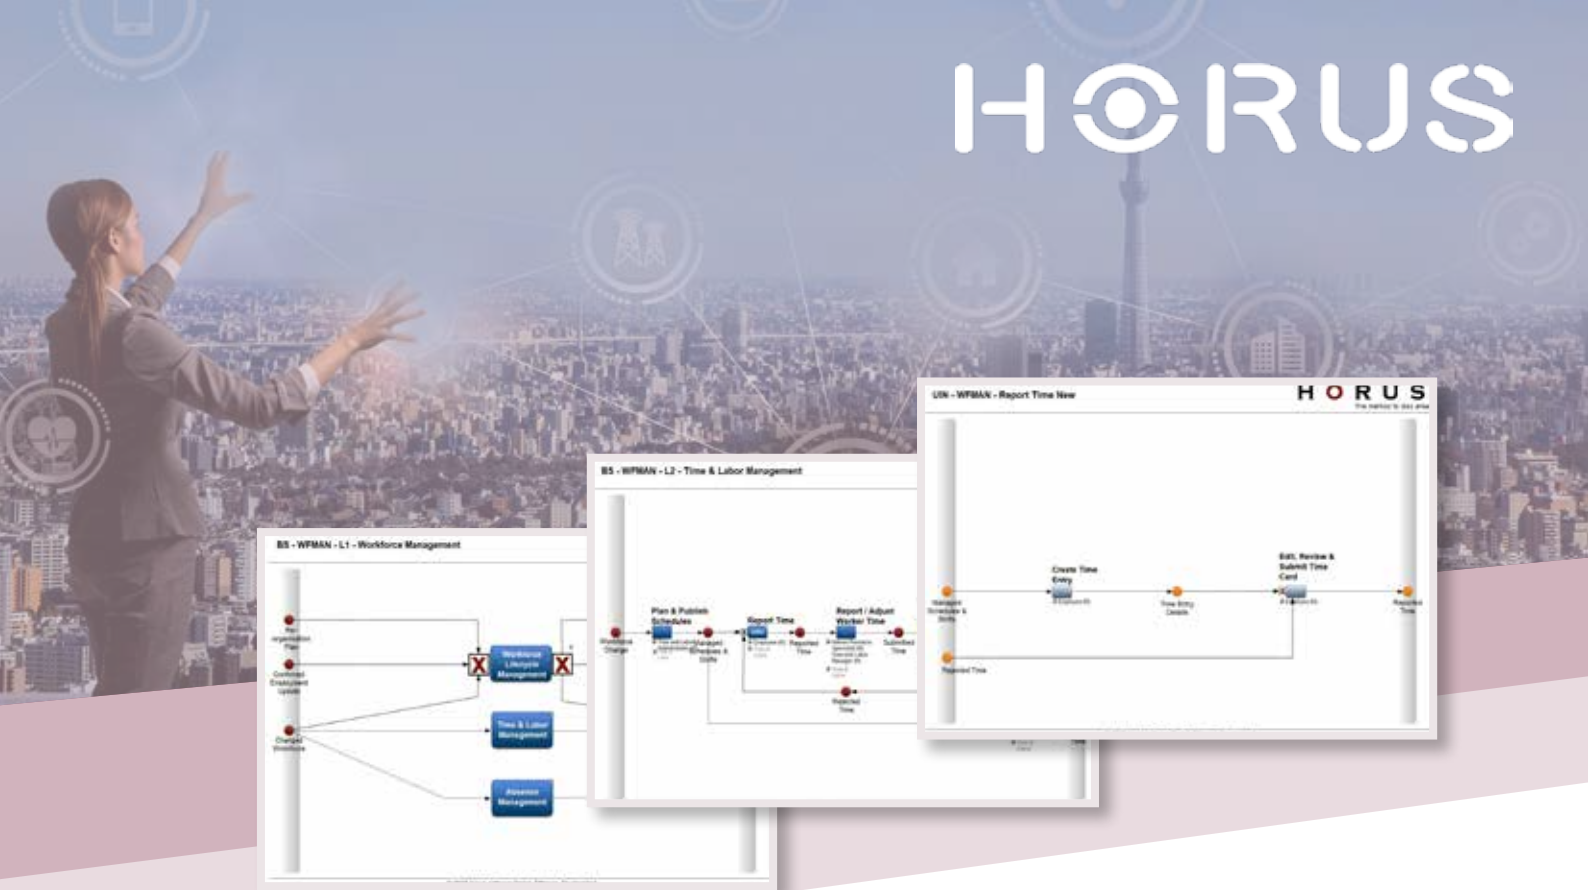

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with respect to the possibility of exchanging invaluable knowledge within the user community.

#### Components of the knowledge product BP4 Time and Labor

An extensive knowledge base is the core of Horus BP4 Time and Labor and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core consists of the following modeling components:

- Intuitive and mobile time recording
- Absence management
- Predefined integration to Oracle Projects Cloud and Oracle Payroll
- Employee and manager self-service
- Reporting

Extensive knowledge models for functional structures of the Oracle Time and Labor Cloud

## Commercial Framework

The price of BP4 Time and Labor is determined according to the Oracle Time and Labor Cloud services licensed for the customer as follows:

Volume class	Hosted Named User	Annual subscription fee
I:	≤ 1.500	EUR 600,00
II:	1.501 - 3.000	EUR 1.200,00
III:	> 3.000	EUR 1.800,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

## Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
