

BP4 Enterprise Contracts

Oracle Enterprise Contracts Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

Enterprise Contracts ensures compliant processes within your business

Companies are faced with many challenges these days. One big challenge is to keep track of all contracts and agreements affecting relevant business transactions. Since the process of managing contracts is prone to errors and hard to control, a centralized repository containing all relevant contracts, i.e. Oracle Enterprise Contracts, comes in very useful. Accurate decisions regarding procurement, sales, service and projects can be met. Another advantage is that the whole contract lifecycle, from authoring and negotiation through implementation, enforcement, evaluation and closeout, is covered.

Comprehensive process- and user knowledge for Oracle Enterprise Contracts

With Horus BP4 Enterprise Contracts, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant

Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with regard to the respective intended use. The same applies to the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Enterprise Contracts

An extensive knowledge base is the core of Horus BP4 Enterprise Contracts and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core is formed by models to the following Enterprise Contracts areas:

- Sales contracts
- Procurement contracts
- Service contracts

Commercial Framework

The price of BP4 Enterprise Contracts is determined according to the Oracle Enterprise Contracts services licensed for the customer as follows:

Volume class		Annual subscription fee	
Hosted Named User			
I:	≤ 15	EUR	1.200,00
II:	16 - 50	EUR	2.400,00
III:	> 50	EUR	3.600,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
