

BP4 Global Trade Management

Oracle Global Trade Management Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

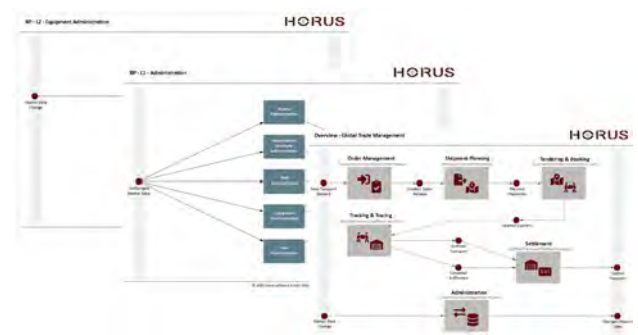

Optimization and monitoring of cross-border transactions

The Oracle Global Trade Management Cloud provides a unified trade and transportation platform to optimize and monitor cross-border transactions of companies, regardless of size and location. The physical flow of goods is enriched by trade data and milestones, granting companies full visibility and control over orders and shipments.

Comprehensive process- and user knowledge for Oracle Global Trade Management Cloud

With Horus BP4 Global Trade Management, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with regard to the respective intended use. The same applies to the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Global Trade Management

An extensive knowledge base is the core of Horus BP4 Global Trade Management and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core consists of models for the following Global Trade Management areas:

- Global Trade Content Management
- Trade Master Data

Commercial Framework

The price of BP4 Global Trade Management is determined according to the Oracle Global Trade Management Cloud services licensed for the customer as follows:

Volume class	Hosted Named User	Annual subscription fee
I:	≤ 250	EUR 1.800,00
II:	251 - 500	EUR 3.600,00
III:	> 500	EUR 5.400,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
