

BP4 Maintenance Management

Oracle Maintenance Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

Efficient maintenance processes

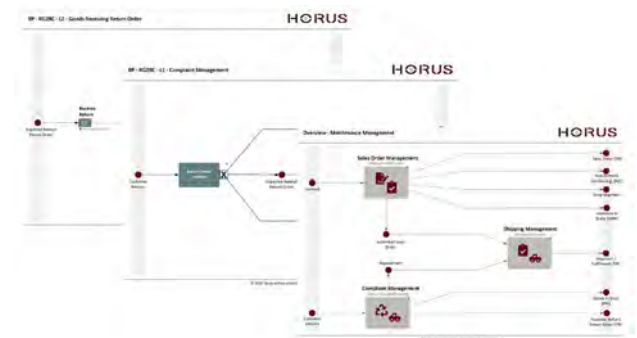

With the help of the Oracle Maintenance Cloud, maintenance processes can be defined visually. Assets can be created, maintained and repaired. The Maintenance Dispatch List enables the execution and completion of work orders. Spare parts can be procured easily via the Oracle Procurement Cloud. Internet of Things, Artificial Intelligence and Machine Learning ensure smart decisions and efficient maintenance processes.

Comprehensive process- and user knowledge for Oracle Maintenance Cloud

With Horus BP4 Maintenance Management, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with regard to the respective intended use. The same applies to

the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Maintenance Management

An extensive knowledge base is the core of Horus BP4 Maintenance Management and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core consists of models for the following Maintenance areas:

- Asset Management
- Maintenance Scheduling
- Spare Parts Procurement

Commercial Framework

The price of BP4 Maintenance Management is determined according to the Oracle Maintenance Cloud services licensed for the customer as follows:

Volume class		Annual subscription fee	
Hosted Named User			
I:	≤ 25	EUR	2.800,00
II:	26 - 100	EUR	5.600,00
III:	> 100	EUR	8.400,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
