

BP4 Procurement

Oracle Procurement Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

Automation of purchasing processes

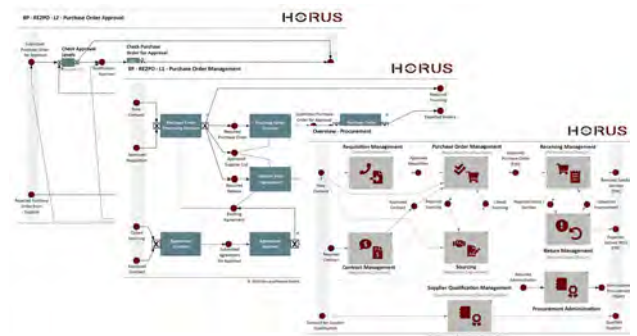

The Oracle Procurement Cloud enables the automation of procurement processes which creates flexibility for strategic and tactical tasks. It is a powerful sourcing module which accelerates negotiation processes and provides real-time insight into award decisions. Processes as the supplier qualification and the evaluation are also possible, as well as an exclusive purchasing from approved suppliers. The Oracle Procurement Cloud enables efficient and powerful procurement processes and guarantees the prerequisites for seamless collaboration with suppliers.

Comprehensive process- and user knowledge for Oracle Procurement Cloud

With Horus BP4 Procurement, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with

regard to the respective intended use. The same applies to the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Procurement

An extensive knowledge base is the core of Horus BP4 Procurement and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core is formed by models to the following Procurement areas:

- Requisition & Purchase Order Management
- Contract, Tender & Goods Receipt Management
- Return Management
- Supplier Qualification Management

Commercial Framework

The price of BP4 Procurement is determined according to the Oracle Procurement Cloud services licensed for the customer as follows:

Volume class		Annual subscription fee	
Hosted Named User			
I:	≤ 15	EUR	3.200,00
II:	16 - 50	EUR	6.400,00
III:	> 50	EUR	9.600,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
