

BP4 Supply Chain Planning

Oracle Supply Chain Planning Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

Adaptive Supply Chain Planning

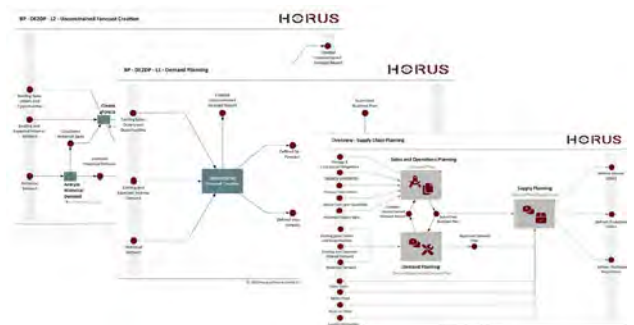

Today's supply chains are more global, complex and volatile than ever. With the Oracle Supply Chain Planning Cloud, the entire supply chain can be planned along efficiently in order to increase revenue and reduce costs. The Oracle Supply Chain Planning Cloud integrates demand management, supply planning, sales and operations planning and supply chain collaboration processes, thus improving profitability, accelerating innovation and achieving business results.

Comprehensive process- and user knowledge for Oracle Supply Chain Planning Cloud

With Horus BP4 Supply Chain Planning, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way

and with regard to the respective intended use. The same applies to the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Supply Chain Planning

An extensive knowledge base is the core of Horus BP4 Supply Chain Planning and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core is formed by models to the following Supply Chain Planning areas:

- Demand Management
- Supply Planning
- Sales & Operations Planning

Commercial Framework

The price of BP4 Supply Chain Planning is determined according to the Oracle Supply Chain Planning Cloud services licensed for the customer as follows:

Volume class		Annual subscription fee	
Hosted Named User			
I:	≤ 15	EUR	2.200,00
II:	16 - 50	EUR	4.400,00
III:	> 50	EUR	6.600,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
