

BP4 Warehouse Management

Oracle Warehouse Management Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

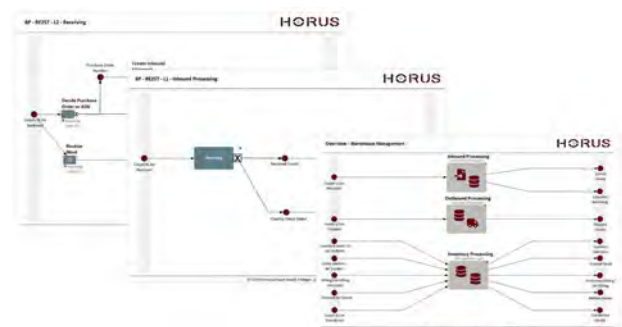

Warehouse Management for the order-processing economy

The Oracle Warehouse Management Cloud is a class-leading and comprehensive warehouse management solution that offers a global view on the inventory, from the distribution centers to the goods shelves. With a broad functional range, complex order fulfillment processes are optimally supported and the precision of deliveries and inventory management is increased. The movement of stock as well as the current statuses of all incoming activities, the stock available and the outgoing shipments of all locations can be tracked in real time. This innovative and continually developing technology allows companies to adjust to current business and market changes.

Comprehensive process- and user knowledge for Oracle Warehouse Management Cloud

With Horus BP4 Warehouse Management, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud.

In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with regard to the respective intended use. The same applies to the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Warehouse Management

An extensive knowledge base is the core of Horus BP4 Warehouse Management and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core is formed by models to the following Warehouse Management areas:

- Inbound and Outbound Logistics
- Warehouse Management
- Inventory Management

Commercial Framework

The price of BP4 Warehouse Management is determined according to the Oracle Warehouse Management Cloud services licensed for the customer as follows:

Volume class Hosted Warehouse Transactions		Annual subscription fee	
I:	≤ 500	EUR	2.800,00
II:	501 - 2.000	EUR	5.600,00
III:	> 2.000	EUR	8.400,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
