

BP4 Project Execution Management

Oracle Project Management Cloud Insight for Users & Application Experts

Horus BP4Apps stands for „Business Processes for Oracle Cloud Applications“ and provides comprehensive process and application knowledge for the Oracle SaaS product portfolio.

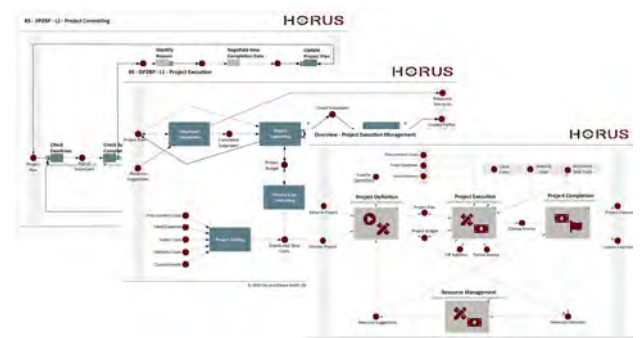

Support collaborative project planning and project execution

In the business process area of project execution management, companies can configure how to execute projects, including the management of requirements, task scheduling and collaboration, human resources, the maximization of use, problem solving, and the completion of services. Moreover, Project Execution Management enables fast identification of project costs and efficient project cost controlling.

Comprehensive process- and user knowledge for Oracle Project Management Cloud

With Horus BP4 Project Execution Management, the user or application expert gains an easy-to-use, knowledge-based system which can be obtained as a service from the Horus Public Cloud. In the private Horus Community Portal, extensive business process knowledge is made available for the relevant Oracle application modules. The user community gains access to the tool in a target-group-friendly way and with regard to the respective intended use. The same applies to

the possibility of exchanging invaluable knowledge within the user community.

Components of the knowledge product BP4 Project Execution Management

An extensive knowledge base is the core of Horus BP4 Project Execution Management and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core is formed by models to the following Project Management areas:

- Collaborative project planning
- Project execution

Commercial Framework

The price of BP4 Project Execution Management is determined according to the Oracle Project Management Cloud services licensed for the customer as follows:

Volume class	Hosted Named User		Annual subscription fee
I:	≤ 100	EUR	1.800,00
II:	101 - 250	EUR	3.600,00
III:	> 250	EUR	5.400,00

The scope of delivery includes the respective licensed knowledge models as well as the use of the Horus repository and the Horus Private Community as a service from the Horus Public Cloud. The Horus Public Cloud is hosted in a German data center.

Licensing

BP4Apps products contain product-specific knowledge models including reference processes, user instructions and test cases. Cloud licenses of the product „Horus Private Community“ with the restriction of an exclusive use with BP4Apps are included in the distribution package.

The purchase of Horus Cloud Services is based on a cloud service contract of Horus software GmbH. The customer agrees to the terms valid at the time of acquisition. The minimum contract period is 3 years. After that, it is automatically renewed each year.
