

Knowledge Bases

Digital knowledge management for process optimization

Business process management solutions are increasingly becoming the focus of digitization projects and pose new challenges for companies. After all, a clean and transparent documentation of common business processes is essential for successful implementation. This is where Horus Knowledge Bases come to the rescue – in the form of prefabricated and quality-assured reference models, users can access business knowledge from various industries and task areas.

Productivity and quality through Best Practice Reference Models

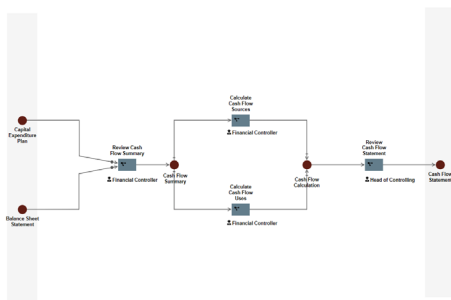

More than 20 years of project experience gained by business experts is embedded in Horus' Best Practice reference models. As such, they are the ideal starting point for ambitious modeling projects and allow for the optimization and benchmarking of individually created models. This creates a perfect basis for reengineering business processes and efficiently introducing new tools in practice. The models can be used either completely or only in parts. Horus Knowledge Bases are continuously developed and improved as strategic products.

Digital Knowledge

Business Transformation

Horus Knowledge Bases as a foundation for digital knowledge management

Horus Knowledge Bases are predefined and already quality-assured models that are easy to understand and logically linked. The models depict standard business processes, offering users different views of the process aspects relevant to them. As such, the models are intended to serve as a template for users in the planning, modeling, and optimization of their own business processes. This allows for a quick entry into modeling projects and ensures the mapping of company-specific processes through flexible customization.

Business Transformation with Knowledge Bases

With Horus Knowledge Bases, the user receives an easy-to-use knowledge-based system that is obtained as a service from the Horus Public Cloud. The comprehensive business process knowledge is made available in the Horus Knowledge Explorer. The access for the user is target group-oriented and related to the respective purpose of use. This also applies to the possibilities for invaluable knowledge exchange within the company.

Prefabricated and quality-assured knowledge:

Horus Knowledge Bases can be applied in all business areas and business transformations:

- Finance & Controlling
- Project Management
- Supply Chain Management
- Logistics
- Manufacturing & Maintenance
- Product Lifecycle Management
- Human Capital Management
- Marketing & Sales
- Customer Service
