

Comprehensive knowledge models for technical structures of the Oracle Financials Cloud

Global, complete and integrated Financials Suite with specific local solutions

Oracle Financials Cloud is based on a robust, global architecture that comprises tax-, payment- and accounting engines, meeting a wide range of global business requirements and enabling customers to configure these functions according to their country- and business requirements. It is designed for global use and available in 23 languages. The application allows for the illustration of almost any desired complex business structure. By using the standard function, several financial requirements can already be implemented via configuration. In addition, Oracle Financials Cloud provides country-specific localizations for particular payment formats and tax reports to meet local business requirements.

Comprehensive process and application knowledge

With Horus BP4 Financials, the user or application expert receives an easy-to-use knowledge-based system, which is obtained as a service from the Horus Public Cloud. The Horus Knowledge Explorer provides comprehensive business process knowledge for the relevant Oracle application modules. The access for the users is target group oriented and related to the respective purpose of use. This also applies to the possibilities for invaluable knowledge exchange within the company.

Components of the knowledge product BP4 Financials

An extensive knowledge base is the core of Horus BP4 Financials and allows the user a profound insight into the functional structures of Oracle Cloud Applications. This knowledge base consists of easily comprehensible, logically linked models that provide different perspectives on the user-relevant aspects of Oracle Cloud Applications.

The core is formed by models to the following Finance areas:

- Accounts receivable & accounts payable department
- Asset accounting
- Payment management
- General ledger accounting
- Expense management
- Reporting
